JSON file discrepancies for PCSP V2.0

This note details discrepancies in the JSON file for the Personalised Care and Support Plan Standard V2.0.

Care and support plan section

The description for Strengths/Free text

The person's strengths (in free text). If the strengths are coded then this is any supplementary or personalised information that relates to the coded strength.

The description for Needs, concerns or problems/Free text is incorrect and should be:

The person's needs, concerns or problems (in free text). If the needs, concerns or problems are coded then this is any supplementary or personalised information that relates to the coded need, concern or problem.

The description for Needs, concerns or problems/Goals and hopes/Free text is incorrect and should be:

The person's goals and hopes (in free text). If the goals and hopes are coded then this is any supplementary or personalised information that relates to the coded goal or hope.

The description for Needs, concerns or problems/Goals/Actions and activities/What is incorrect and should be:

The person's actions (in free text). If the actions are coded then this is any supplementary or personalised information that relates to the coded action.

The description for Needs, concerns or problems/Goals/Actions and activities/Stage goal/Stage goal/Free text is incorrect and should be:

The person's stage goal (in free text). If the stage goal is coded then this is any supplementary or personalised information that relates to the coded stage goal.

The description for Needs, concerns or problems/Goals/Actions and activities/Stage goal/Outcome/Free text is incorrect and should be:

The person's outcome (in free text) of a stage goal. If the outcome is coded then this is any supplementary or personalised information that relates to the coded outcome.

Contingency Plans

The section name and description for contingency plans are later versions and include references to safety which aren't shown in the PRSB viewer or Excel versions.

Performing professional/Organisation

In all occurrences of performing professional the data item “Performing professional/Organisation” is classified as a group. It should be classified as a data item with a value set of “NHS data dictionary : - [Organisation data service](#)”.

Performing professional occurs in following sections;

- Formulation,
- Care and support plan,
- Contingency plan, in Contingency plan/Advance statement and Contingency plan/Anticipatory medicines/equipment
- Additional support plan
